

LP2

Differential Pressure (Uni-Directional) with LCD Option

The R/LP2 Series pressure transmitters incorporate a durable piezoresistive sensing element to enable low pressure measurements. Integrated temperature compensation with offset and span calibration enhances the performance of these devices and provides long-term reliability. An optional LCD provides an initial set up reference, trouble shooting assistance, and performance monitoring. Each unit offers field selectable outputs and additional ranges. The R/LP2 Series is calibrated using N.I.S.T. certified references to ensure a high level of accuracy.

The R/LP2 Series is covered by an industry-leading Five (5) year warranty, which can be found on our OEM's web site, which is www.workaci.com.
